

Community Smoke Alarm Walks

About the Program

Our Community Smoke Alarm program brings together volunteers and firefighters to install 10-year, battery sealed, dual-sensor smoke alarms and Deaf & Hard of Hearing smoke alarm systems in high-risk households throughout Arizona, at no cost to residents.

You are placed in groups and given the necessary tools, training, and materials to install and educate residents about burn prevention and fire safety.

This is a great family-friendly opportunity to make a difference preventing home fire deaths and burn injuries for Arizona children and adults.

2025 Spring Calendar
